

Improving the function of the foot and leg

Assess Function: 6 tests™

test 1. Subtalar Motion Test

test 2. Alignment Test

test 3. Supination Resistance Test

test 4. Jack's Test

test 5. Balance Test

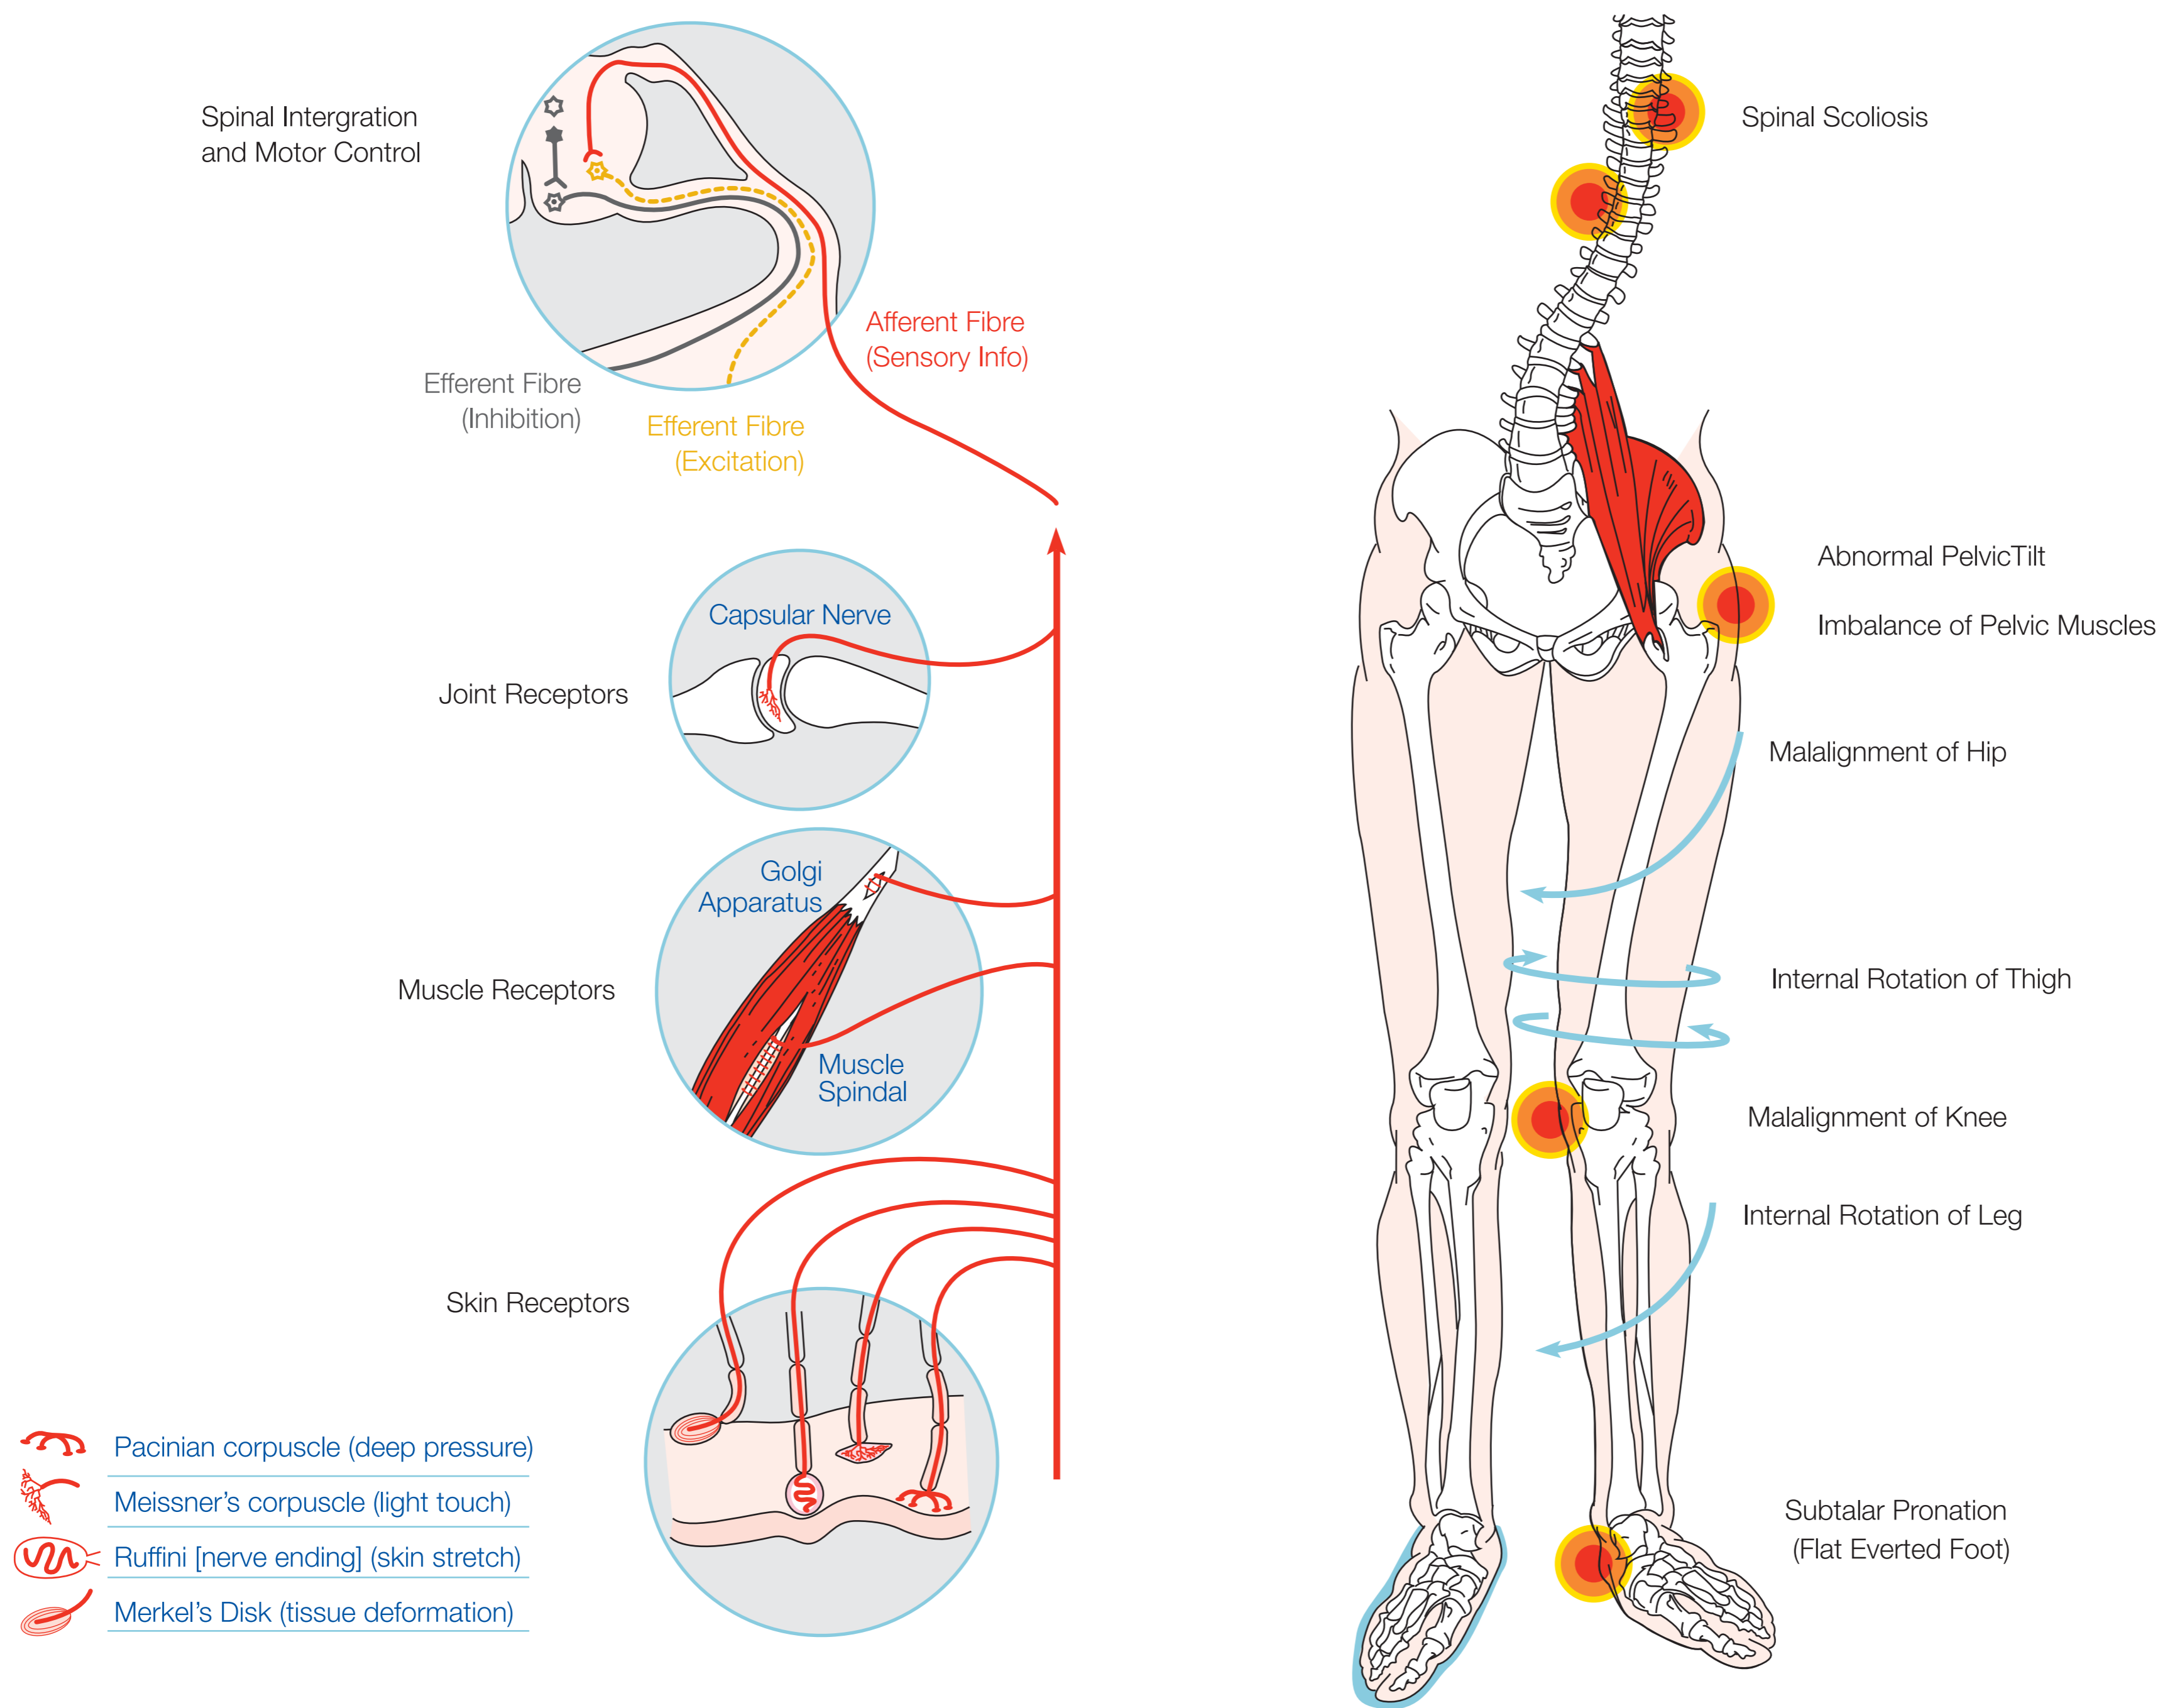

test 6. Forefoot Stability Test

Formthotics™ achieve

Neuromotor Facilitation

Biomechanical Control

Formthotics™ Improve Neuromotor Function

Formthotics™ Reduce Subtalar Pronation

Formthotics™ are both Neuromotor (total contact) and Biomechanical (shell and posts) devices.

Improve Function: 6 steps™

step 1. Heat Formthotic™

step 2. Break-In Period

step 3. Rearfoot Adjustment

step 4. Forefoot Adjustment

step 5. In Shoe Testing

step 6. Ongoing adjustment
